

OPEN STARTER
Type XLS27 15 HP

NEMA 1 ENCLOSED
(Starter XLS7 10 HP)
(Rail mount option)

NEMA 4X ENCLOSED
Starter XLS07 with
start/stop operator

AEG MAXIMUM H.P. is a conservative rating fully equivalent to or surpassing NEMA ratings. Mechanical life is 10,000,000 operations with electrical life approximately 1,000,000 operations at full rated Horse Power.

For **STOCK FLEXIBILITY**, one enclosure covers 4 sizes thru 15 HP, 460 Volt.

0 to 15 HP (460V)

20 to 50 HP (460V)

EEControls size groupings were designed to match logical motor Horse Power groupings as used throughout industry. As such, more sizes are offered than the NEMA industry. Each unit fully meets applicable codes and can be applied per the NEC code. More sizes allows users to closer match their motor and drive package with the result of substantial cost and space savings.

#M01-070405 used with:

Single or 3-Phase Starters	
Type XLS 4	7.5 HP*
XLS 7	10 HP
XLS 17	10 HP
XLS 27	15 HP

#M01-070405 used with:

Single or 3-Phase Starters	
Type XLS 37	25 HP*
XLS 47	40 HP
XLS 57	50 HP
RXLS 4,7,17,27	

In industry, the metal **General Purpose NEMA 1** Enclosure is the most widely used and versatile design. As standard, a selection of knockouts are provided on all sides for conduit entry and for field start-stop kit or selector switch additions.

Dust Tight Water Tight Enclosures - NEMA 4X

#S4X-RVJ 1008 used with:

Single or 3-Phase Starters	
Type XLS 4	7.5 HP*
XLS 7	10 HP
XLS 17	10 HP
XLS 27	15 HP

#S4X-RVJ 1210 used with:

Single or 3-Phase Starters	
Type NEMA 4X	
XLS 37	25 HP
XLS 47	40 HP
XLS 57	50 HP
RXLS 4,7,17,27	

► **TYPE 4X ENCLOSED STARTERS.** NEMA 4X starters are UL/CSA Listed starters enclosed in type 4X U.L. Listed enclosures. Type 4X enclosures are designed for outdoor/hose down/dust tight applications and are non-metal corrosion resistant.

*Add Primary Fusing to transformer on "UL Labeled" Controls.

For other Starter Modifications See Page AEG 33.

WIRING DIAGRAM - FULL VOLTAGE STARTERS

* Alarm Contact not standard on XLS07.
* On BO5 ** Overloads (95/96) terminals are connected opposite of above.

For Line Voltage Coil Control
a) Connect Wire "1" to L1.
b) Connect Wire B from L2 to 96.

For Separate Supply Voltage Control
a) Connect separate supply voltage to Wire "1" and Term. 96 on overload.
b) Remove jumper B.

*Coil Suffix ◇◇Overload Suffix For Modifications see page AEG 33. For 3 or 4 speed starters check with factory.
Order Example: 2SHLS17S-A-L, N+M1 (size 0, 7^{1/2}HP Two Speed Constant HP, NEMA1 Enclosed)

*To determine overload size see back inside cover for approximate currents.

2 speed starters require high speed & low speed currents suffixes in part number.
